

SPIN2STALL passes 4 Million

Australian coal mining is enjoying a resurgence with maintaining underground roadway development rates a critical aspect of achieving targeted production tonnes. Jennmar's J-Lok Spin2Stall resin capsules are widely recognised as being an advantageous element in achieving consistent and forecasted high development rates, with usage of these products accelerating dramatically over the past 2 years.

In January 2016, Jennmar celebrated the installation of the one millionth J-Lok Spin2Stall resin bolt in Australia. In the 2018 calendar year alone Jennmar sold more than one million J-Lok Spin2Stall resin capsules to Australian underground coal customers. The productivity, operational and quality benefits available from using J-Lok Spin2Stall are now the industry benchmark in roof bolting.

J-Lok P Trial at Costerfield

Successful J-Lok P trials were conducted in February at Costerfield Gold and Antimony mine in Victoria. Installation of single and twin strand 6.5 metre cables in 65mm drill holes was completed, pumping an average of 43kg (90lbs) of J-Lok Australia resin per hole. Installation of multiple cable bolts, plating and tensioning to 10 tonne using the Jennmar battery operated cable jack allowed full installations to be completed in 20 minutes.

Safety Awareness Week

At Jennmar and Jennchem in Australia, we consider safety to be a core value. We are committed to the health and safety of all employees and have initiated a Safety Awareness Week program in order to help employees refocus on their commitment to safety. Providing employees with the knowledge and skills required to become safer in their workplace is of paramount importance. During the week employees were encouraged to contribute safety awareness ideas and posters and we concluded the week with a plant BBQ at each manufacturing site. Congratulations to all employees for their active participation confirming everyone's ongoing commitment to safety.

Mick Baker appointed as QLD Branch Manager

Mick Baker has been appointed as QLD Branch Manager. Mick has been a valued member of the Jennmar team for the last 17 years and was instrumental in the establishment of our Mackay bolt plant facility. In 2005, after successfully achieving certification in both the safety and environment management systems Mick was appointed the Australian National Safety, Training and Environment Manager. Over the ensuing years with his positive leadership, Mick has built a culture of health and safety throughout the Jennmar Australia workplace. Mick brings a wealth of knowledge and experience to his new role in the Queensland management team and we wish him well in his new role.
