

CUTTABLE SUPPORT

JENNMAR FIBREGLASS TENSIONABLE DOWELS

Features

- Used for ground support where extraction includes cutting of bolts
- High torsional strength material minimises risk of damage to fibreglass from twisting
- Break-out cap is designed to break into small pieces to clear easily from spanners/dollies
- "V" notch end to promote shredding of the resin capsule film
- Continuous rope thread providing large deformations for resin mixing and high bond strength with the rock
- 22mm diameter dowel for high strength and maximum encapsulation by volume
- Recommended for drill hole diameters 33 - 35mm

Rod Diameter (mm)	UTS Rod (Tonne)	UTS with Nut (Tonne)	Rod Single Shear Strength (kN)	Shank Torque (N.m)
22	>25	>5	>55	>130

Packaging: Standard Pack = 250, but customer specific packaging is available

Colour Code: ALL Jenmar tensionable dowels are white in colour

Application	Nut Break-Out (N.m)	Colour
Hydraulic Rib Bolters	60 - 75	White
Hand held Windy Borer	30 - 50	Purple
