

CUTTABLE SUPPORT

PLASTIC STEEL COMBINATION PLATES**Features**

- Used as surface support where extraction involved cutting the support
- Thin 3mm steel plate encased within the main plastic plate provides up to 3 times the strength of a standard plastic plate
- Superior strength is compatible with new improved fibreglass dowels
- Steel plate thin gauge and rounded corners minimise risk of conveyor belt damage
- Steel covered by plastic to minimize corrosion of steel

Shape	Dimensions (mm)	Hole Diameter (mm)	Collapse Load (kN)*	Pull Through Load (kN)*	Compatible Dowel Diameter (mm)
Round	230 diameter	33	>15	>50	22
Square	300 x 300	60	>15	>50	32

*Tested over a 150mm span to simulate soft coal ribs

Packaging: Standard Pack = 500
