

STEEL MESH

MINE MESH**Features**

- Trimmed edges to ensure there is limited overhang of wire to cause injury when handling
- Weld tests completed on all welders over continuous runs
- Weld strength to be greater than 75% of the wire UTS
- Wire diameters, spacing and overall dimensions can be customised to suit particular applications
- Customised paint lines along the modules to suit roof bolt patterns
- Available as strap from 4mm to 8mm diameters
- Custom sheets available with double or additional wires if requested

Packaging

- Steel or plastic strapping
- Bundle sizes to suit the customer. Generally packs of 30

Weld Strength

4mm = 4.7kN

5mm = 7.4kN

5.6mm = 9.2kN

7mm = 14.4kN

8mm = 18.9kN

10mm = 29.5kN

Component	Strength	Standard
Wire	Yield = 500 - 750 MPa	AS4671:2001 Grade 500L
Galvanising	-	AS2423:2002 to type W02Z
