

CABLE BOLTS

TOTO TENSIONING DEVICE**Features**

- Eliminates the need for hydraulic tensioners for pre-tension up to 10 tonne
- ToTo devices come factory pre-pressed onto the end of each cable bolt
- No loose components or pinch points on the ToTo device during manual handling
- Components are joined for transport by a shear pin which shears upon tightening
- 70mm outside diameter enables the device to fit through ALL gripper jaw types on bolting rigs
- Dome ball washers fit existing cable bolt plates for the respective 22mm and 28mm diameter cables

Suit Cable Diameter	Maximum Outside Diameter (mm)	Length (mm)	Typical Cable Breaking Load (tonne)
22mm	70	150	50
28mm	70	150	55
