

CABLE BOLTS

30T TENSIONERS**Features**

- 30 tonne cable bolt tensioner
- MDG41 specification
- Light weight
- Low operating pressure (370 Bar)
- Double acting to release tensioner off the cable under hydraulic power
- Patented design has engineered out possible pressure intensification within the double acting cylinder by having equal advance and retract ram areas
- Suits up to 29mm diameter cable
- Patented design used special high capacity wedge setting springs to minimise tensioning bleed-off while maintaining a short tail on the cable bolts

**TYPICAL APPLICATIONS**

- Goliath cables, Sumo Cables and Superstrand
- Can be connected to continuous miners, air tracks or portable air/hydraulic power packs

Cable Tensioning Capacity	Maximum Operating Pressure	Ram Area	Stroke	Weight	Minimum strand length required
30 tonne	370 Bar	79.9 cm ²	87mm	14kg	100mm

Jack wedge part #	Suit cable, diameter
JACKW22	Superstrand, 22mm
JACKW28	SUMO and TG, 28mm
JACKW29	Goliath, 29mm
