

RESIN CAPSULES & ACCESSORIES

# TENDON FORMULA (OIL BASED CATALYST)

## Features

- For anchoring flexible cable tendons in a small annulus
- Separate resin mastic and catalyst encased within a thin plastic film, sealed at each end by wire clips
- Oil based catalyst as 7% of capsule
- Typical nominal diameter of 25 mm
- Available gel times of 90 seconds and 20 minutes

Typical packaging for standard 25mm diameter capsules is shown below:

Capsule Length (mm)	800 - 1000	1100 - 1500
Quantity per Box	25	20
Quantity per Pallet	1050	840

Shear Strength (MPa)	>22
Shelf Life	4 months

Capsule Length (mm)		Approx Spin Time (secs)	Approx Hold Time (secs)
S	Slow	10 - 20	>80
XXS	Extra Extra Slow	20 - 40	>1200

\*Relevant specifications are taken at 25°C
