

RESIN CAPSULES & ACCESSORIES

CRACK DETECTOR

Features

- Easily readable measurements that indicate the distance up the drill hole
- 1800mm length - Shorter or longer sizes available
- Washer dimensions – nominally 1mm thickness and 22mm diameter
- Has user friendly handle
- No FRAS issues - made from wood dowel
- Lightweight - can be stored on the Continuous Miner or in the crib – room when not in use

Technical Details

- When resin loss into the strata is suspected, it can be used to find location of any cracks in the strata by dragging the washer against the drill hole
- Not intended as an accurate measuring device
