

RESIN CAPSULES

RAPID DEVELOPMENT CAPSULE

Features

- Increased productivity – no waiting for resin to cure before tightening the nut for most installations
- Self-auditing bolt installation – based upon remnant thread length of bolt which provides an indication of the standard of installation
- High pre-tension levels can still be achieved where required
- Extensive research and independent testing shows minimal damage to resin bond using rapid development
- Uses J-Lok dual speed specifically formulated accelerated cure resin capsule and Jenmar bolt with engineered accurate and reliable pin break out level
- Available in diameters of 26 and 30mm
- Available gel times range from 12 seconds to 90 seconds
- Other sizes available on request

Typical packaging for standard 26 mm diameter capsule is shown below:

| | | | |
|--------------------------------|------|-------------|-------------|
| Total twin Capsule Length (mm) | 1800 | 2100 - 2400 | 2900 - 3000 |
| Qty per box | 12 | 9 | 7 |
| Qty per pallet | 504 | 378 | 294 |

| | | |
|-------|-------------------------|-------------------------|
| Speed | Approx Spin Time (secs) | Approx Hold Time (secs) |
| RAPID | 20 - 25 | 2 - 3 |

Shelf life 6 months when stored as recommended

Typical packaging for standard 30 mm diameter capsules is shown below:

| | | | |
|--------------------------------|------|-------------|-------------|
| Total twin Capsule Length (mm) | 1800 | 2100 - 2400 | 2900 - 3000 |
| Qty per box | 9 | 7 | 5 |
| Qty per pallet | 378 | 294 | 210 |
