

EYE BOLTS & HANGERS

'CLIP UP' HOOK**Features**

- The Sorrich "Clip Up" hook has been developed for underground application and designed to hold four inch (110mm) Polyurethane Pipe
- Load rated hanger to 800kg WLL
- The diameter of each separate hook is 120mm, allowing enough room to easily slide "poly" inside the circumference of each hook and just enough room for the poly pipe to be held firm inside the hook to reduce movement. Each 4-inch poly line are then locked in place by our patented locking system, which integrates with the Minsup clip for quick and easy installation. The "Clip Up" is made from 6mm galvanised mild steel for strength and to prevent rusting in normal underground environments
- The top is an open 2-inch (66mm) hook for possible temporary 2-inch poly pipe or for use with power or pump cable, which prevents tangles amongst other lines.
- The backside of the hook has been designed to be capable of clipping back to the mesh or rock bolts with a simple "D" shackle when hanging in the "shoulders".
- This product is the only one of its kind on the market and it is the safest, fastest and neatest way to install poly pipe.

Dimension (mm)	Thickness (mm)	Pipe Diameter (mm)	Working Load Limit* (kg)	Unit Weight (kg)	Standard Packaging
940 x 190	6	120	800	1.5	50

* Destruction testing applied through the top and bottom mounting points
