

Rock Bolt Accessories

M24 Tension Indicator Washer

Features:

- Centralising corner lugs to match the standard M24 Dome ball
- Collapses/inverts uniformly at the rated tension load and torque
- Used in conjunction with mated flat washer to prevent frictional heating or damage to the tension indicator washer
- Washer does not collapse onto the thread and can be removed by hand if the nut is taken off
- Coloured RED dome is hidden when the correct load is applied

Dimensions (mm)	52 x 52
Load at Collapse (tonnes)	6 - 8
