

Rock Bolts

M24 JBX Torque Tension Bolt

Features:

- The "X" grade steel used by JENNMAR has a superior toughness and ductility through the use of grain refining alloys. The JENNMAR "X" grade bolts provide better performance in mines where Stress Corrosion Cracking is evident and also in areas of high localized horizontal stresses
- All nuts are coated with a dry film molycoat to provide low friction and corrosion resistance
- All nuts are connected to the bolt by a shear-pin with varying ranges of torque breakout strength
