

Mesh

Woven Mesh

- High strength woven mesh designed to minimize displacement and provide ground support system solutions
- Designed for long term support in extreme conditions such as draw points
- 200kN capacity at less than 300mm displacement
- Easy Installation from standard bolting machines
- Modular panels allowing multiple sheet installation together utilizing hooked design
- Available as plain or with hot dip galvanised corrosion protection

Property	Unit	Typical Value
Wire Diameter	mm	10
Aperture	mm	100
Load Capacity	kN	230
Module Size	mm	1500 x 2400
Module Mass	kg	43
